P363 Wash contaminated clothing before reuse.

### Storage Precautionary Statement

P405 Store locked up.

### Disposal Precautionary Statement

P501 Dispose of contents/container in accordance with local, regional, national and international regulations.

**Directions:** Always read original bottle label instructions. Before applying Graffiti Remover on the surface, make sure that the (fragile) areas around are well protected from any overspray of the product. If the area is fragile, do a test and wait to see if an undesirable effect occurs. Do not dilute the product or mix it with another. Make sure the surface is dry before applying the Graffiti Remover. The time required for cleaning depends on the type of ink/paint, thickness, and temperature (35°C max). Most tags and graffiti will fade in less than 10 minutes. Do not allow Graffiti Remover to act for more than 15 minutes on the surface. If Graffiti Remover has not worked properly during the time allowed (15 minutes), remove it from the surface with a clean (cotton) cloth and reapply Graffiti Remover.
